# Sizland FAQ

**Q: What is Sizland?**

A: Sizland is a secure Web3 fintech ecosystem designed to empower communities, especially in Kenya, through accessible investment tools, decentralized applications, and a user-friendly experience.

**Q: Who founded Sizland?**

A: Sizland was founded by Jay, a blockchain expert with over 10 years of experience as a Web3 researcher, technical writer, and cryptocurrency news reporter.

**Q: What inspired the creation of Sizland?**

A: Jay's experience witnessing knowledge gaps and losses in Web3 inspired him to create a safer, more guided platform for users to engage with blockchain technology.

**Q: What is the Sizland Hub?**

A: It's the central dashboard where users access investment tools, the ERP system, the exchange, and other platform features.

**Q: What is the SIZ token used for?**

A: The SIZ token powers the platform, covering transaction fees and supporting future utilities like staking rewards and governance.

**Q: Can I trade crypto on Sizland?**

A: Yes. Sizland includes an integrated cryptocurrency exchange where users can trade SIZ, company tokens, and other cryptocurrencies.

**Q: What is the ERP system?**

A: It's a SaaS platform that allows businesses to manage operations and issue their own tokens for incentives and fundraising.

**Q: Is there a unified wallet?**

A: Yes. Sizland offers a single wallet that supports SIZ tokens and all tokens created on the ERP platform.

**Q: How is Sizland different from other platforms?**

A: Sizland combines user education, secure tech, and utility dApps like vaults for NFT documents and tokenized medical records to reduce risk and empower users.

**Q: Who handles Sizlands technical operations?**

A: ContWhizz manages operational strategy, compliance, and Web2-Web3 transition, while Reltime powers the blockchain infrastructure.

**Q: What is ContWhizzs role in Sizland?**

A: ContWhizz handles business development, compliance, and strategic growthensuring smooth Web3 adoption.

**Q: What does Reltime provide?**

A: Reltime offers Layer-1 infrastructure using a fast, energy-efficient PoA protocol. It supports peer-to-peer lending, payments, and RWA tokenization.

**Q: Is Sizland launching publicly soon?**

A: Yes, after two years of development and two completed components, Sizland is preparing for public rollout with a strong go-to-market strategy.

**Q: What are the future plans for Sizland?**

A: Sizland plans to launch dApps like a medical records vault, NFT document storage, and tools for tokenizing real-world assets.

**Q: How can I get involved in Sizland?**

A: Join the community, participate in discussions, follow the roadmap, and use the SIZ token to

access the platform's full utility.
